

ISHLT2027

47th Annual Meeting & Scientific Sessions

14 – 17 April Sydney, Australia

An Investment That Comes Back to Your Institution

Support attendance at ISHLT2027 and bring new knowledge, connections, and opportunities home.

Supporting a member of your team to attend the ISHLT 47th Annual Meeting & Scientific Sessions in Sydney is an investment in your institution and the individual.

ISHLT brings together the international multidisciplinary community working across advanced heart and lung disease, including advanced therapies, transplantation, mechanical circulatory support, and pulmonary vascular disease. Attendees learn from experts and peers, explore new research and technologies, compare approaches with other centers, and build relationships they can put to work when they return home.

Why Send Your Team to ISHLT2027?

1

Clinical Advancement

Attendees return with new research, evolving treatment approaches, best practices, and emerging technologies — and a better understanding of what may be relevant to your patients, programs, and teams.

2

Operational Benchmarking

Conversations with colleagues from around the world provide practical insight into how other institutions approach shared clinical and operational challenges.

3

Research Expansion

Attendees can meet investigators, find potential collaborators, explore multicenter and registry projects, learn about ISHLT Foundation research grants, and develop relationships that expand your institution's research and international connections.

4

Staff Retention & Growth

Education, networking, and exposure to leaders across the field build expertise and professional relationships. Supporting that development strengthens your team while demonstrating an investment in the people you want to develop and retain.

Post-Event Impact

The benefit of ISHLT2027 continues after the meeting. Attendees return ready to

Share important clinical and scientific developments with colleagues.

Identify new practices, resources, or technologies worth exploring.

Apply useful ideas to your program and patient care.

Connect your institution with new research and professional contacts.

Bring the learning, connections, and opportunities home.
